

Eye Log: Log Storage

Accelerate response and audit readiness

Eye Security is expanding its Eye Cyber Guard offering with Eye Log, enabling faster incident investigations and audit readiness by providing businesses with secure, cloud-native, and cost-predictable log storage. This solution is designed to help organisations simplify risk compliance and strengthen their security operations while reducing log management complexity and cost.

Key product capabilities

Cloud-native log storage

Replace complex, legacy on-premises log management systems with a cloud-native solution that delivers predictable costs and scalable log retention. Store up to 12 months of log data with flexible, volume-based tiers that grow with your environment.

Extensive log support

Ingest various log types including network, system, application, cloud, and identity and access for advanced coverage.

Enhanced context for threat hunting

Centralise network log data to speed up scoping, identify lateral movement, and uncover hidden threats faster.

About Eye Security

Eye Security, a European leader in managed cybersecurity, delivers enterprise-grade protection to mid-sized organisations by combining 24/7 MDR with cyber insurance in one fully managed solution. This end-to-end approach helps businesses reduce cyber risk, maintain insurability, and ensure operational resilience, without added complexity.

Key benefits

- **Integrated MDR and logs**
Accelerate protection with a solution that unifies log coverage across environments.
- **Faster incident response**
Speed up investigations and cut MTTR by giving SOC and threat hunting teams immediate access to log data.
- **Forensic readiness**
Preserve logs to enable teams to reconstruct incidents quickly to support both audit and investigation needs.
- **Meet business risk requirements**
Use secure log retention options with on-demand retrieval to simplify risk compliance and accelerate audit readiness.
- **Flexible storage options**
Choose the storage tier that fits your needs today and scale up as your organisation grows, pay only for what you use.
- **Eye Portal integration**
View log usage statistics, access monthly reports, and manage record requests from a single platform.
